AQUAMARINE SIMPLIFIES FAB AND ASSEMBLY TO BUILD A BETTER, LESS COSTLY PRODUCT

Empire Machinery takes on Salvagnini product line

Empire Machinery & Tools Ltd., Winnipeg, has partnered with the Salvagnini Group, Hamilton, Ohio, to sell the company's machines in Manitoba, Saskatchewan, and Alberta. According to Empire, with an increasing demand for automated and customized bending, laser cutting, and punching systems in Canada, Salvagnini's product line seemed like a natural fit.

The Salvagnini Group has five manufacturing plants, 23 operational sites specializing in sales and customer support, 31 service centers, and more than 6,000 installed systems across 75 countries.

The company designs, builds, sells, and services flexible systems and machines for processing sheet metal: punching machines, panel benders, press brakes, fibre laser cutting machines, FMS (flexible material storage) lines, automatic store-towers, and software.

Empire will represent Salvagnini's P4 and P4lean, P2lean, and P1 panel benders; the S4 integrated

punch/shearing system; the SL4 punching/fibre cutting system; the S4+P4 complete panel production FMS line; the L3 and L5 fibre laser cutting machines; the B3 press brakes; the ROBOformER

Salvagnini - Empire's Newest Partnership!

robotic bending cells; and MD automatic pack or MV tray store-towers and integrated systems for factory logistics.

More detail and videos of the Salvagnini product line can be seen on Empire's website, www.empire-machinery.com/equipment-tag/salvagnini/.

Muratec

MURATA MACHINERY USA, INC.

FIRST BY CHANCE, INNOVATIVE BY CHOICE.

From the first in the industry to the first in class, we're bringing more choices to the machine you've always trusted.

M2044TS-S

Raises overall productivity with high-speed processing, reliability and accuracy.

M3058TG-S

Heavy duty 2-piece machines featuring indexable multi-tools.

M2048TS-S

Intelligent control operations, including scheduled job production.

M2558TS-S

Integrates bending, forming and tapping processes with state-of-the-art precision and efficiency.
